

Project:

Report Date:

Attached Pages: ☐ Accident Report ☐ Incident Report ☐ Safety Violation

Page: _____ of _____

Blast and Paint	Yes	No	Platform Repairs Performed			
Are all hoses, couplings, whipchecks, and fittings properly secured?						
Are all deadmen fully operational?						
Blast hoods and other proper PPE is being used in good working order?						
Are spray gun safety tips on and knuckle guard and safety lock in good working order?						
Are all filters (organic vapor and dust) regular end of life change cycle checked?						
Platform/Scaffold	Yes	No	Platform Repairs Performed			
Decking checked for loose sheets and use of self tapping screws to secure overlaps inside work area?						
Decking checked for missing or loose clips inside of work area?						
Tie-ups checked for equal tension to keep platform level inside of work area?						
Perimeter protection in good working order and/or 100% tieoff enforced on platforms?						
Platform checked for any debris inside of work area?						
Containment	Yes	No	Comments			
Inspection of the containment for integrity (Sealing of joints and openings, floor covering, make-up air openings and employee entrance area).						
Was the containment dry before blasting?						
Were the dust collectors and vacuum machine fully functional throughout the blasting period?						
Inspection of the containment for final cleaning.						
Visible Emissions	Locations		Time	Observation Period	Emission Time	
	Comments/Corrections					
Work Area	Yes	No	Comments			
Is the restricted work area segregated with caution tape & Signs?						
Are employees and others working and/or entering into the restricted work areas using required PPE?						
Inspection of the work area for any evidence of spillage or dust accumulation						
Decontamination Area	Yes	No	Comments			
Inspection of the decontamination area for cleanliness and functionality of the wash station?						
Inspection of the decon for soap, water, towels and clean work clothing?						
Did employees exposed above the PEL take showers at the end of the work day?						
Was dirty clothing sent to an offsite location for cleaning on this day?						
Was contaminated water shipped on this day?						
Are Respirators being properly maintained, cleaned and stored?						
Waste Area	Yes	No	Comments			
Is the hazardous waste area secure?						
Is the hazardous waste properly stored?						
Has any waste been stored over 60 days?						
Was the hazardous waste area inspected for cleanliness and whether any additional clean-up required?						
Was hazardous waste shipped on this day?						
Life Safety	Yes	No	Comments			
Availability and functionality of safety and other equipment inside and outside of the containment?						
Are first aid kits readily available at the work site?						
Testing and calibration check on CO monitors?						
Any accidents reported on this date?						
Any safety violations or warnings issued on this date?						
Testing	Yes	No	Comments			
Have all workers received medical clearances (blood and fit tests) to wear a respirator and work with Lead?						
Have all workers received annual lead training?						
Any monitoring performed today (Air, Wipe, Water, Soil, Waste) Enter Date of when samples where sent for analysis_____
